

MAZZEI GDT™ DEGAS SEPARATOR

High-Performance
Gas Separation

*World Leader
in Mixing and
Contacting
Technologies*

12" Unit Shown

1"-3" Size

4"-16" Size

The Mazzei GDT™ Degaser is a patented unit that utilizes centrifugal force to create a vortex enabling entrained gases to be extracted from water. The water-entrained gas mixture enters the top of the separator tangentially and flows through an accelerator plate, which increases velocity. The water spins down through the separator and exits the bottom. The entrained gas travels through the vortex where it passes into a collector and flows out the top of the separator. The separated gases exit the separator through a degas relief valve.

Powder Coating or Scotchkote™ Interior

Black PVDF Separator

Standard Stainless Steel Separator

Available Options Include:

- ▶ Connections for the 1" – 3" models
- ▶ Various materials of construction (e.g., carbon steel, CPVC, 316L and duplex stainless)
- ▶ Scotchkote™ interior for corrosive applications
- ▶ Powder coated exterior
- ▶ Manufacturing to ASME code

Minimal pressure loss across each unit

Construction is 316L Stainless Steel with glassblast finished exterior or PVDF

Current design maximum pressure is 80 PSI, and maximum temperature is 200° F

Inlet and outlet flanges are 150# RF per ANSI B16.5

The Maximum Gas Flow, listed above, will decrease with lower operating pressures
